

Digital Image Processing Project

Image processing Projects:

Group-1: Domain specific

- 1- Facial Expression Recognition
- 2- Face Blurring for Privacy Protection
- 3- Face morphing
- 4- Smart traffic control system with application of image processing techniques
- 5- Finger print recognition
- 6- Face recognition
- 7- Text detection
- 8- Car plates number detection
- 9- Video annotation
- 10- Image Watermarking in Spatial Domain
- 11- Image watermarking in frequency domain
- 12- ROI segmentation for medical images
- 13- Image based content retrieval
- 14- Image Mosaicking
- 15- Brain Tumor extraction from MRI images
- 16- Breast cancer detection
- 17- Hand Gesture Recognition Using PCA

Group-2: Generic framework

- 1-** Noise Removal
- 2-** Edge detection
- 3-** Image Filtration
- 4-** Colored image enhancement
- 5-** Iris recognition
- 6-** Image zooming and shrinking
- 7-** Image Clustering
- 8-** Image compression
- 9-** Image enhancement using point operation
- 10-** Coloured image quantization
- 11-** Image Encryption/decryption
- 12-** Texture image segmentation
- 13-** Enhancement by morphological operations
- 14-** Region based image segmentation
- 15-** Moving object detection and tracking
